

Chief Technology Officer (CTO) Job Description

We seek a highly skilled CTO or Senior Back-end Engineer with a history in the technological sector. CTOs are tasked with making executive technology decisions on behalf of the company, including managing a technology budget and making investments to align the company with its vision for its technological needs. You should be a strategic thinker, an effective communicator, and an expert in technological development.

You will work directly under the CEO and will act as both a technology and business expert, making decisions that will impact the current and future operations of the company.

As PandaTech is a start-up, some points described above might not be valid in the short run.

Responsibilities

- Setting a vision for how technology will be used in the company
- Ensuring that technological resources meet the company's short and long-term needs
- Creating timelines for the development and deployment of all technological services
- Making executive decisions on behalf of the company's technological requirements
- Acting as a mentor to team members
- Managing technology budgets and time frames
- Staying on top of technology trends and developments
- Ensuring all technology practices adhere to regulatory standards.

Requirements and skills

- 6+ years working in a technological role
- 2+ years of managerial experience
- Advanced technological skill set and a demonstrated history with technology
- Exceptional team management skills
- Strong problem-solving and verbal and written communication skills
- Ability to delegate efficiently
- Extensive industry knowledge with an eye towards the future.
